

B-Borg

Type of organization

Robotic prostheses supplier and manufacturer

Headquarters (country)

India

Maturity Level

In the market

Organization description

B-Borg it's a project funded by Ali Bradford where we are distributing cybernetic prostheses free of cost to the needing recipients like the 50 hands received from our donator Macksville high school with their awesome students in robotic class. B-Borg aims to manufacture on its own site the devices to develop full-body prostheses that will be operated by Ai and humans to expend quality of life and life expectation above our biological one. The all to be open-source and free of cost for the needing recipients.

Solution/service description

Cybernetic prostheses distribution

aiming for research and development addition
