Community of Interest

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement N° 857223

Who we are?

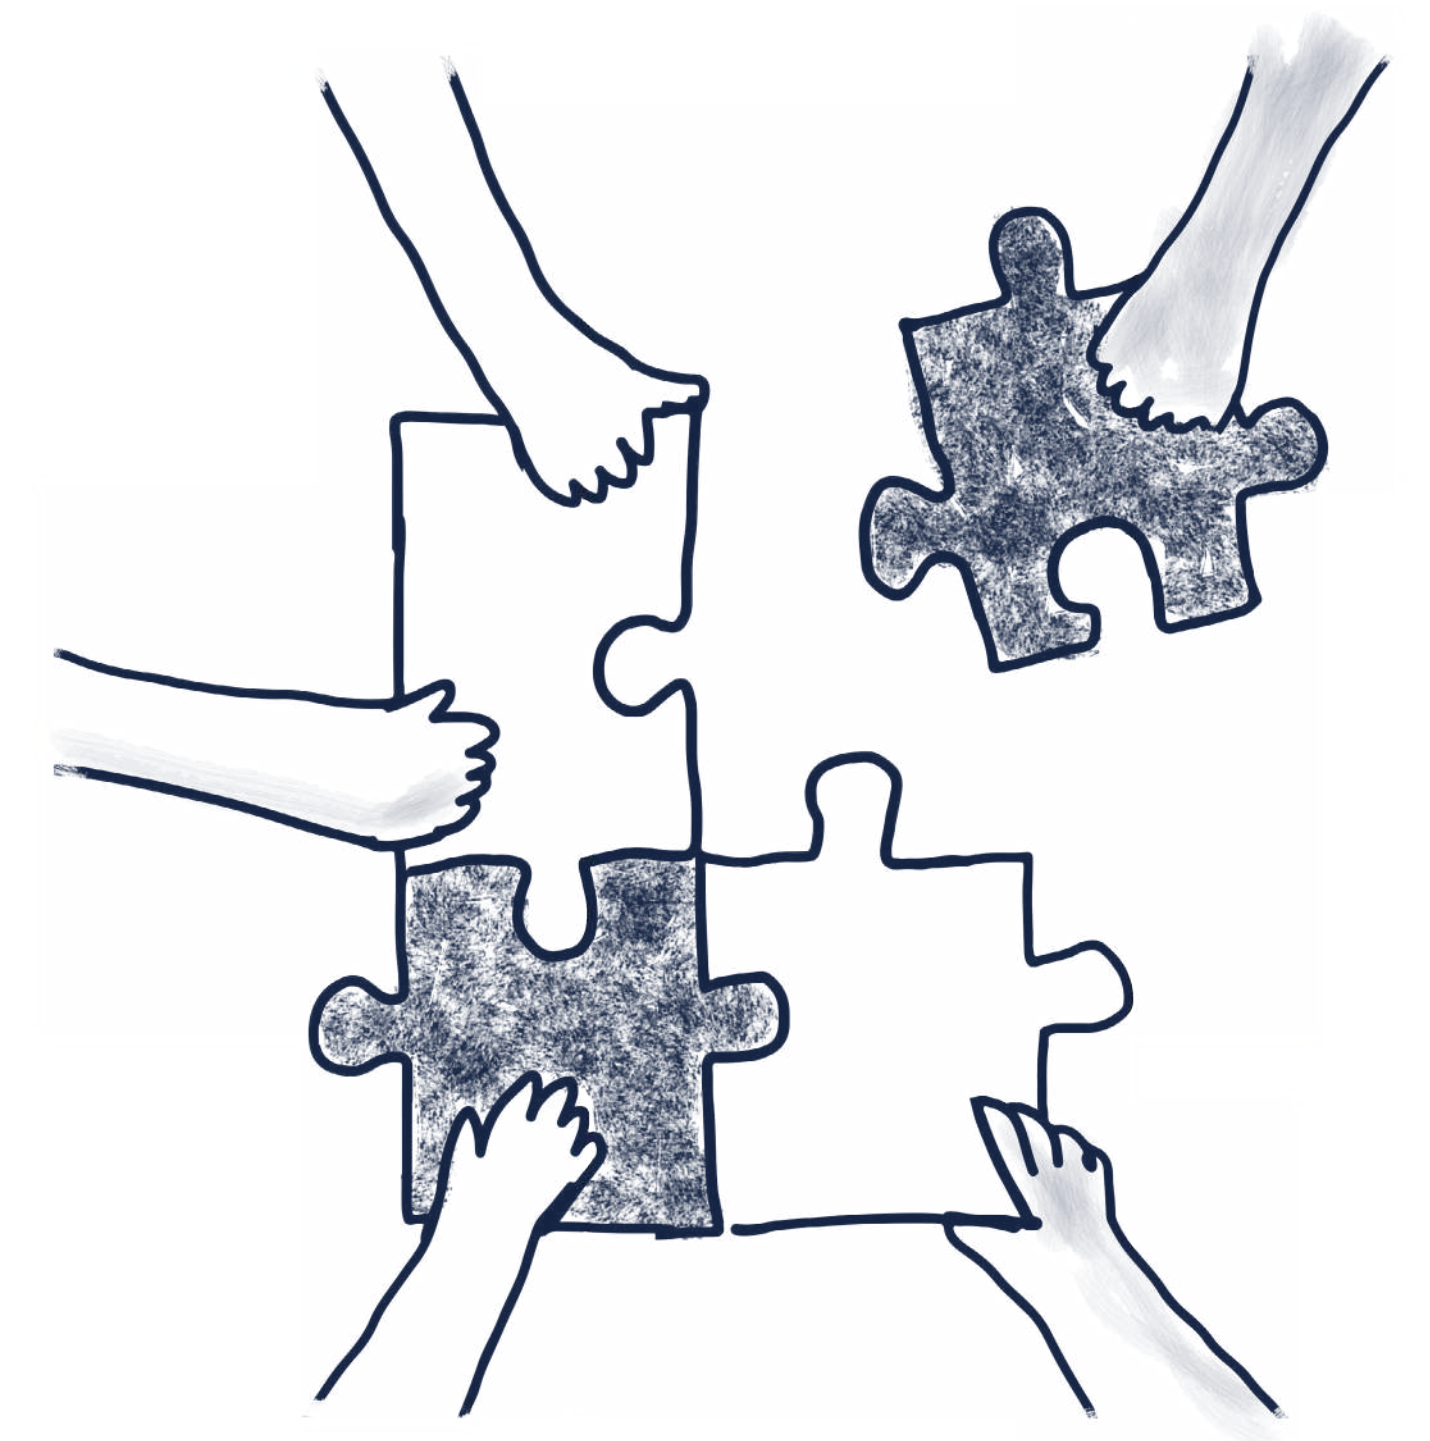

The Gatekeeper Community of Interest (Col) brings together and structures a network of stakeholders across Europe that work or are interested in the healthcare and technology offering portfolio. It is a network of key stakeholders interested in following the developments of the project and as such, attracted by topics at the crossroads of healthcare, artificial intelligent and big data.

The Col has been initiated by communicating about GATEKEEPER among all the partners networks last September 2020. It keeps growing, as more and more stakeholders hear about the project!

The Gatekeeper Community of Interest aims to connect the large network of stakeholders to foster learning, encourage collaboration, and offer an opportunity for creative problem-solving and innovation.

Communities of Interest (Col), or interest-based communities, are groups of people who share a specific topic, and who deepen their knowledge and expertise in the topic by interacting on an ongoing basis for information exchange and to develop relationships with peers and stakeholders.

Our Col is thus especially appealing for stakeholders who might otherwise find it difficult to influence decisions, at a high-policy level, by supporting a more active participation in decisions as a first step to broader 'bridging' between different communities. Part of building trust at the local, national and European level is about linking empowerment to a wider process of learning and accepting the complex and the long-term nature of innovation in the health and care sector.

For whom?

Digital health companies

«We connect you with opportunities in the sector of digital health technologies»

If you are an entity providing digital health innovative products, services or solutions interested in extending your footprint, finding new customers and partners to improve Quality of Life and Healthcare, Gatekeeper Community of Interest is for you.

Regulatory entities and policy makers

«We are the bridge between you and the digital health companies»

There are many other types of entities providing value to the healthcare ecosystem in Europe from perspectives different from technological companies or healthcare providers, such as user associations, regulatory entities, standardization organizations or policy makers. If you are an entity that have a specific interest in Gatekeeper platform and mission success, participate in the design of the strategy and help it grow.

Healthcare providers and individuals

«We guide you for innovating in digital health area»

If you are an entity providing healthcare services or a person interested in consuming, utilizing, accessing the most innovative healthcare products, services and solutions available in the Gatekeeper ecosystem, the Col is for you.

Why should you participate?

Online catalogue

It is the place to showcase and/or get to know first-hand different experiences/products/solutions and innovative services of digital health for the daily problems in health care, in a simple and user-friendly way. You would be able to publicize your solutions, as well as contact other companies that have complementary solutions or find the right product or service for your challenge.

Sharing needs

It's the best place to know all these solutions and companies in a structured way, as well as share your needs or interests.

A community adds value to your interests

Whether you're a large business, a health and care provider, a policy maker or an entrepreneur, a community can act as a valuable resource. It's a place where you can easily find information and answers to your most pressing questions.

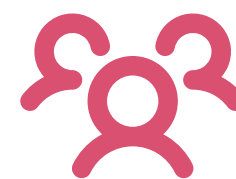

A focus group for innovation

Multiple stakeholders coming together will allow you, as participants, to see the needs and interests of the other organisations in the value-chain.

Find the competitive edge

The inputs from others and the connections established within the Col will favour discussions around unique niche experiences. Maybe there is something different about your organisation that you can use to influence policy making and innovation.

The Col members

Say hello to the most innovative companies in healthcare. A bunch of professionals with different backgrounds willing to leave the comfort zone and to make digital health transformation happen. Happy to have you on board!

eGATEKEEPER Hub

It will be a place for organizations already engaged in the community that wants to offer, publish, or communicate their solutions, products, or services (in case of the digital health companies); Or share their interest and needs (in case of health organizations, regulatory entities and/or policy makers)

Transparent and eHealth focused

The eGATEKEEPER Hub will be an online catalogue featuring different types of actors: SMEs, investors, healthcare organizations, legal and regulatory service providers, healthcare companies, etc. By identifying the key European eHealth actors, the Members Hub Platform aims to enhance transparency in the sector and enable stakeholders' interaction to promote and accelerate business growth.

Find what you are looking for

Do you want to know the offer in European digital health? Looking for a technological partner to collaborate with? Come and find them all.

Be discovered

Increase your company visibility. More than 50 players are in the platform and will have access to your information. Create a profile, state what you are looking for. It is the place to be!
