

## **FARMADOSIS**

### **Type of organization**

Medical devices manufacturer/vendor

### **Headquarters (country)**

Spain

### **Maturity Level**

In the market

### **Organization description**

Farmadosis is one of the leadership in pharmacy management and drug dosage ( SPD ) services at a national and international level (we are present in more than 25 countries on five continents). Our goal, in the healthcare sector, is to optimize, through engineering and software, processes and traceability of drug supply. In addition, we facilitate the work of our clients with the application of a comprehensive 360° online monitoring system.

### **Solution/service description**

Through our SPD solutions for pharmacies , intake control systems, dispensers, blistering machines. Farmadosis offers you a comprehensive service for the efficient and automated management of your pharmacy or hospitals.

### **Features/product description**

The preparation of SPD in multidose form is a good solution to save time and avoid errors in the preparation of medication for hospital patients. The preparations can be made for specific periods of time, by plants, dining rooms or centers according to the needs of the final patient.
