

## **LifeCharger srl**

### **Type of organization**

Healthcare service provider

### **Headquarters (country)**

Italy

### **Organization description**

In short LifeCharger has developed a platform for the delivery of person-focused telemedicine services in their own home.

The platform allows to track the therapeutic adherence and support the patient in its management, to acquire physiological parameters both in terms of remote monitoring and self-monitoring, the monitoring of symptoms, the involvement of caregivers.

Specific attention was paid to lifestyle supports (movement / sedentary lifestyle and diet).

In developing its platform, LifeCharger made use of the collaboration of prima clinical institutes and research centers.

### **Interest**

In order to broaden our range of action we are looking for operational collaborations in several European countries. We are also interested in collaboration for participation in tenders.

### **Needs**

Collaborations with health organizations to experiment with the use of our platform in different areas.

Collaboration with subjects able to develop innovative analyzes of the data collected by users to create new usage scenarios."
